DEPARTMENT OF SOFTWARE ENGINEERING
COS 201: COMPUTER PROGRAMMING 1 - THEORY

Answer Question 1 and any other 3

11/02/2026

Time Allowed: 2 hours: 30 minutes

Question 1 ✓

- i. State five properties of a good program. Which of these properties is most important and why?
- ii. Name the 5 tips to improve on your programming skills.
- iii. Present a tabular comparison between an algorithm with a flowchart.
- iv. Define the 3 types of errors and illustrate each with example program code in any programming language of choice.
- v. Define the term **Data Type** and Name the 10 primitive data types with an example of each.

Question 2 ✗

- i. Define the following terms : (a) Object Code (b) Source Code (c) Interpreter (d) Assembler (e) Compiler (f) syntax (g) object oriented programming (OOP) (h) List data structure (i) Enumerate () (j) Stack.
- ii. List the 6 concepts of OOP as found in Java/Python.
- iii. List the 5 basic operations on Stack data structure.
- iv. Briefly explain the terms using a preferred programming language: (Java,C++,python,C#):
(a) Recursion (b) Try, Error/Catch and Exception handling.

Question 3 ✓

- i. (a) Explain the Java Platform with annotated diagram (b) State the units of a Java program.
- ii. Write a 6 line Java program to print "Hello World".
- iii. Choose a programming language (Java,C++,python,C#) and write a program to illustrate and print a declared string.
- iv. Choose a programming language (Java,C++,python,C#) and write a program to print the length of a declared string using the length function.

Question 4 ✓

- i. Define Programming paradigm in your own term, Naming it's two broad categories.
- ii. Describe any 6 programming paradigm you know.
- iii. Give 2 programming language in each of the paradigm.
- iv. State 3 advantages and 3 disadvantages of each paradigm.

Question 5 ✗

- i. Name the six commonly used packages in JavaFX.
- ii. List and briefly explain the six key components to build a MySQL student record GUI system with JavaFX.
- iii. Name and briefly explain the 4 core functionalities (CRUD) in the student record GUI system.
- iv. Write the JavaFX class to (a) connect the MySql Student Registration database and (b) To insert the student record of : Name, DOB, Reg. No., and Department into Student Table.

Question 6 ✓

- i. Define Scripting language and Name and Discuss it's four characteristics.
- ii. Name the two **kinds** of scripting languages and list the uses of each, total 8 uses.
- iii. Name 10 Scripting languages.
- iv. Discuss the 7 uses of Javascript.

pcn
psvm i
str first = Hello
str second = world.
cout first + second
}
